Dr. M. Gordon Hunter is a Professor of Information Systems in the Faculty of Management at the University of Lethbridge, Alberta, Canada. From April to July 2009 Gordon is a Fellow in the Department of Computer Sciences and Mathematics at the University of Applied Sciences - München.

Gordon’s research approach takes a qualitative perspective employing Personal Construct Theory and Narrative Inquiry to conduct in depth interviews. His June 3 seminar presentation will include a description of his research approach including an overview of three projects, as follows:

- “Excellent" Systems Analysts: Skills and personal characteristics of information systems professionals. Interviews were conducted with business and information systems groups in Canada and Singapore.

- The Contemporary CIO: Management Experiences: Investigation of the role of the Chief Information Officer. Interviews were conducted with Chief Information Officers in New Zealand, Taiwan, and the USA.

- Multi-Generation Small Business: Factors supporting the long term existence of small family business. Interviews were conducted with small business owners in Lethbridge, Alberta.

About the Fellowship:
Established in 2007, the Fellowship is a prestigious program by the University of Applied Sciences - München to foster international academic relations between guests from all over the world and our university of applied sciences.
