

SYSTEM OPERATOR (m/f)

Trimble® VRS Now™

Your chance for a long-term career with Trimble

Founded in 1978, Trimble is a recognized worldwide leader in the development of innovative Global Positioning System (GPS) technology-based products for a wide range of applications ranging from agriculture and construction to asset management, automotive and timing. Trimble products are used in over 100 countries around the world. Employees in more than 21 countries, coupled with a highly capable network of dealers and distribution partners serve and support our customers.

<http://www.trimble.com>

Trimble's original Integrated Surveying Solutions offers surveying instruments such as GNSS and GPS receivers, optical total stations, and 3D scanners, plus VRS – all designed to work seamlessly together. There's something in the air. And it's bringing increased accuracy, improved productivity and immediate return on investment. Trimble® VRS Now™ is a subscription service that provides instant access to RTK (real-time kinematic) corrections on demand.

Key areas and duties of position:

The primary duties of this position are to oversee and manage the day to day operations of Trimble® VRS Now™ in Europe. These duties focus primarily on the Trimble® VRS Now™ applications software, applications hardware, wired and wireless communications, reference stations operations, data integrity, database administration, system performance analysis, subscriber connectivity, and subscriber satisfaction. Other duties include assisting Trimble® VRS Now™ Authorized Business Partners with any system issues; liaising with managed service providers, cellcos, and broadband providers to assist in the running of the system as well as Interact with Trimble Support to assist in resolving subscriber issues.

Education / Characteristics / Experience / Skills

- BS in computer science or engineering preferred.
- Professional experience in **Programming, Software Development, Databases**, Geomatics or related field.
- Advanced GPS/GNSS Geomatics/RTK/Network RTK and computer networking knowledge; understanding of cellular telephony principles and applications.
- Excellent verbal and written communication skills and English and German language ability to a high level is required.
- Ability to operate successfully within a matrix/multifunctional business organization.

Location: Höhenkirchen (near Munich)
