Department: 11 Applied Social Sciences

Course title: Scenario Development

Hours per week (SWS): 3

Number of ECTS credits: 5

Course objective: reach a thorough understanding of how future research is conducted and gain hands-on experience in a team-based practical implementation

Prerequisites: none

Teaching methods: team work with activating input and individual research

Assessment methods: ePortfolio of learning process and results; presentation of results (groups)

Language of instruction: English

Name of lecturer: Peter Duerr

Email: peter.duerr@hm.edu

Link: https://www.sw.hm.edu/die_fakultaet/personen/professoren/duerr/index.en.html

Course content: In this seminar students learn about the most common approaches to strategic foresight with a methodological focus on scenario development. They reach a thorough understanding of how future research is conducted and gain hands-on experience in a team-based practical implementation.

Remarks: It is expected that students organize some of their research with experts outside of the university.
