055 Historical buildings and monuments in Munich (CiE)

Thematik:
Munich has many famous buildings from different eras. This course will provide an overview of the traditional and contemporary architecture in the centre of Munich. Moreover, we will follow the stylistic changes and have a look at building technique and discuss form and function. Finally, we will keep an eye on the migration of models and architects across Europe to understand the international and intercultural character of architecture.

Lernziel und Kompetenzen: Upon successful completion of this course, participants will have learned about the history and the culture of Munich as well as Bavaria and Germany. Furthermore, they will be able to classify different architectural styles and apply architectural terms.

Methode: The course will take place in front of the original buildings in the city of Munich. Regular attendance is expected together with active participation. Each student will be required to do a short presentation on a building and to write a paper. Mark is based on paper and presentation.

Hinweis: An obligatory planning meeting will take place on October 17th, 17:00, room T.1.018. The real course is a 3-day-course (November 24th-26th).

Disziplinäre Verortung: Architectural history
