Digi-Slam

DIGI-SLAM initiated by Munich University of Applied Sciences (MUAS) is a series of symposia pursuing two main objectives: Bringing together academia and practitioners to debate changing issues related to digitization, and fostering multidisciplinary cooperation in the field of digitized economy.

Business meets Law

At the event in July 2018 students will give an overview of legal challenges companies are facing around their digitized products. Students will present solutions from their business point of view, or discuss relevant obstacles identified in their research, respectively.

Preview

Digitization is moving forward in giant strides across all industries, resulting in a large number of legal questions and implications companies are faced with. Combining insights from field research by MUAS students with first-hand experience from industry experts, DIGI-SLAM will shed light on subject matters such as:

* What legal issues arise from digital business models in specific industry settings?
* How can these issues be addressed by traditional legal instruments?
* How can business tools be used to support companies dealing with legal obstacles?
* What is the political setting for changes of the legal environment?

We cordially invite you to participate, get new insights and share your experiences with us. Be part of vibrant discussions!

By participating, you agree to the publication of images made at the Digi-Slam.
Directions & Location

Munich University for Applied Sciences
Campus Pasing, KO 127 (old building)
Am Stadtpark 20
81243 München

If you use public transportation, you get to the campus via the station München-Pasing and the bus line 160 (Maria-Eich-Str./Waldfriedhof), stop Avenariusplatz.
