International Project Management

Goals
The Bachelor Degree Program „International Project Management“ imparts useful skills for international work contexts. The focus is on the following areas:
- Project management, from application, development, implementation through to evaluation,
- Business Administration and Economics,
- Law, Mathematics, Accounting,
- Language and Cultural Skills (e.g. German as a foreign language, English)
- Intercultural skills, International Relations,

Target Group
This part-time program is aimed primarily at the following group, whose native language is not German:
- Persons with a degree from a foreign university
- Professionals without an academic degree

With the acquisition of a recognized German university degree, our graduates upgrade their qualifications for international business activities.

Course of Studies
- Academic Degree: Bachelor of Arts (B.A.)
- 210 ECTS
- Length: 11 Semesters, part time
- 2 Internship Semesters (9th and 10th Semester)
- Possibility to shorten program length by crediting past experience
- Courses in basic studies are scheduled in the evenings and on weekends, in the specialization areas also partially during the day

Specialization Areas
From the fourth semester on, you can choose between three different specialization areas:
- Management of Social Innovation
- Business Management
- Information Systems Management

Tuition Fees
Fees are charged at Bavarian Universities for part-time studies (Bachelor and consecutive Master) Each semester, the basic contribution to the student union and the solidarity contribution (MVV Semesterticket are also payable

Outlook

International Projects

Against the backdrop of globalization and increasing competition dynamic, international projects in companies, organizations and public authorities are becoming increasingly important. The professional planning, implementation and evaluation of projects are crucial for determining central adjustment processes and contributing to creative innovation.

Fields of Work

This program provides application-oriented knowledge and capacity-building for project management in:
- international companies and organizations,
- international projects run by private and public service providers with interface functions.

Credit Recognition

Skills that have been acquired as part of a university degree or a professional activity can be credited with equivalence to modules in the program. For further questions please contact the academic advisor at ipm@hm.edu

The development of this part-time studies program at the Munich University of Applied Sciences was part of the joint project „Offene Hochschule Oberbayern“, as part of the first phase of the program „Aufstieg durch Bildung; offene Hochschulen“, funded by the Federal Ministry of Education and Research and the European Social Fund of the European Union. The testing and evaluation of the program takes place in the second phase of the project from Winter Semester 2015/16 until September 2017.
