Remote Sensing / Geodata specialist

EOMAP is the leading provider of satellite based services for offshore industries and environmental water agencies worldwide. We provide professional, easy accessible time- and cost-efficient information services to clients, and collaborate closely with the leading global space- and geospatial industry.

Field of activities for the position:
• Processing of Earth Observation data for different applications using in-house and external software tools and workflows
• Post-preprocessing including QA/QC and reporting

Your profile:
• Sound understanding of the physical background, methods and applications of Remote Sensing data
• Sound background in manipulation and analysis of geodata
• Ideally expertise with satellite data processing or geospatial IT
• Master's/ Bachelor’s (or equivalent industry experience) in Remote Sensing/GIS/Environmental Science or related area.
• Excellent communication skills, team spirit and strong motivation are mandatory

We offer:
• Full time position
• Excellent work conditions in the headquarter castle Seefeld , just 30 minutes outside of Munich
• Interesting topics in collaboration with an ambitious team and external partners
