In den Schuhen des Entscheiders: Die Fallstudienmethode zur Vermittlung von Kompetenzen

Tag der Lehre, 01.06.2017
Hochschule München, Fakultät für Betriebswirtschaft
Prof. Dr. Jessica Slamka
How can students take more responsibility for their own learning in class?

- complex real world situation
- apply
- knowledge of facts
- evaluative skills
Cases tell a story…

... and allow students to step into the shoes of a decision maker
Teaching process

Prepare > Analyze + discuss > Wrap up
In lecturing, success meant that students paid attention, laughed at my jokes, and applauded me. I told them what to learn, and they learned it…. When I teach now now I worry about such questions as whether everyone in the group has participated. Have questions generated energetic (but respectful) controversy? Has the group really pried the case open, created an agenda for further study, and developed a strategy for addressing its own questions?

– Daniel A. Goodenough in *Education for Judgment*
More on teaching cases
